PROJECTS

Project 1. Multi Mediation   Team Size-5   Sep 2016- Present

Multi Mediation is an end-to-end, convergent, multi-purpose platform that collects, formats and distributes accurate network data for all OSS/BSS-related mediation. It is able to handle the massive data loads generated by today's complex services and multi-vendor networks, letting you manage all services, payment methods and network access protocols through one single solution.

Project 2. Digital Land Management System (DLMS)   Team Size-10   Aug 2015- Aug 2016

Digital Land Management Project (DLMS) is an initiative of the Government of Bangladesh aiming at reforms in policy, anti-corruption, integrity of information and effectiveness of governance and citizen services.

Project 3. Medicaid Management Information System (MMIS)   Team Size- 50   Aug 2013- April 2015

Medicaid Management Information System is used by Alaska State government to maintain and manage Medicaid, a joint federal and state program that provides hospital expense and medical expense coverage to the low-income population and certain aged and disabled individuals.
